DECLARATION OF CONFORMITY

Click-Pack Sp. z o. o.

Wiertnicza 169 Street

02-952 Warsaw

Poland

1. The identity of the materials, the articles, products from intermediate stages of manufacture or the substances intended for the manufacturing of those materials and articles.

PET Lids

Are produced in thermoforming technology from PET transparent foil.

After use, the product is 100% recyclable.

2. Confirmation that the plastic materials or articles, products from intermediate stages of manufacture or the substances meet relevant requirements laid down in.

- **Commission Regulation (EU) No 10/2011** of 14 January 2011 on plastic materials and articles intended to come into contact with food with amendments (with amendments).
- **Regulation No 1935/2004 of the European Parliament** and of the Council of 27th October 2004 on materials and articles intended to come into contact with food and repealing Directives 80/590/EEC and 89/109/EEC,
- **Commission Regulation 2023/2006** of 22 December 2006 on good manufacturing practise for materials and articles intended to come into contact with food (with amendments).
- **European Parliament and Council Directive No 94/62/EC** of 20th of December 1994 on packaging and packaging waste (with amendments).
- **Polish "Act Of Safety of food and feed"** of 25 of August 2006 (with amendments).
- **Act of 13 June 2013** on the management of packaging and packaging waste.

All related regulations resulting from **Directive (EU) 2019/904**

3. Adequate information relative to the substances used or products of degradation thereof for which restrictions and/or specifications are set out in Annexes I and II to this

Regulation to allow the downstream business operators to ensure compliance with these restrictions.

Based on the declaration of the producers of raw materials and research we inform that the following substances are used for the production of the raw materials, for which the specific migration limit SML is specified in the regulations:

PM / Ref no	Substance	Restrictions
16990; 15760	Monoethylene and Diethylene glycol	≤ 30 mg/kg
19150	Isophthalic acid	≤ 5 mg/kg
35760	Antimony trioxide	≤ 0,04 mg/kg
24910	Terephthalic acid	≤ 7,5 mg/kg

All levels of migration are in conformity with the legal acts. The global migration limit for our articles is consistent.

4. Adequate information relative to the substances which are subject to a restriction in food, obtained by experimental data or theoretical calculation about the level of their specific migration and, where appropriate, purity criteria in accordance with Directives 2008/60/EC, 95/45/EC and 2008/84/EC to enable the user of these materials or articles to comply with the relevant EU provisions or, in their absence, with national provisions applicable to food;

This declaration is based on the results of tests carried out by an independent, accredited and certified laboratory.

The research for global migration was performed by Accredited Laboratory. The results obviously shows, that our articles meets fully overall migration level do not even coming close to the legally established maximum limit of 10 mg/dm² or 60 mg/kg, included in Commission Regulation (EU) No 10/2011.

Specific migration studies of metals included in Annex II of Regulation (EC) No 10/2011 by Accredited Laboratory show that our articles fully meet the specific migration limit, not coming close to a legally defined limit.

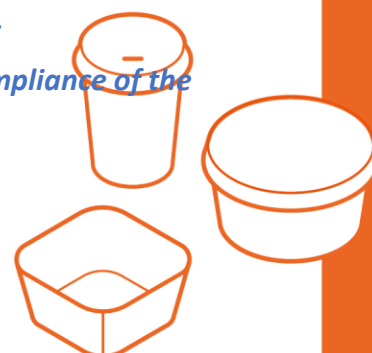

The final materials meets the requirements of Directive 94/62/EC with amendments and contain no harmful and dangerous substances for the environment and the total content of heavy metals Pb, Cd, Cr (VI) and Hg is not exceeded by 100 mg/kg.

5. Specifications on the use of the material or article, such as.

(i) type or types of food with which it is intended to be put in contact;

(ii) time and temperature of treatment and storage in contact with the food;

(iii) ratio of food contact surface area to volume used to establish the compliance of the material or article.

These test results allow to declare the following:

- (i) Our articles can be safely applied to all kinds of food, including fatty, sour and alcoholic food.
- (ii) Taking into consideration perfect results of tests for overall migration and extreme testing conditions (testing during 10 days under temperature +40°C), the time of contact of our articles with food is related to time limits foreseeing for the specific kind of food packed into the articles/put into the articles.

The applicable temperature range for the products is not specified but is recommended in the range -25°C to + 40°C. In particular, the upper temperature level of the articles should not be exceeded.

Subject to the above temperature restrictions, those products placed on the market and used in normal or foreseeable conditions:

- do not pose a threat to human health and life
- do not cause unacceptable changes in the composition of the food
- do not cause any organoleptic changes in food
- have an indefinite useful life, however, a shelf-life of 12 months is recommended

Not recommended for use in microwave and conventional ovens.

(iii) the ratio of food contact area to volume used to determine the conformity of material or article is different for different articles.

6. When a functional barrier is used in a multi-layer material or article, the confirmation that the material or article complies with the requirements of Article 13(2), (3) and (4) or Article 14(2) and (3) of this Regulation

Final verification of the suitability of the product mentioned in the declaration for the type of food used, which it will be filled, lies with the customer

Object of the declaration is consistent with the requirements art. 14 § 2 and 3 Commission Regulation (EU) No 10/2011 of 14 January 2011 on plastic materials and articles intended to come into contact with food (with amendments).

7. Additional information related to the protection of the environment

Click-Pack Sp. z o. o. Limits the amount and negative impact on the environment of substances used in packaging and packaging waste production, and in particular:

Minimizes the volume and weight of packages so that they fulfil their function, taking into the expectations of the user.

taking into account the expectations of the user.

8. Declaration validity term

According to point 15.3 of Commission Regulation (EU) No 10/2011 Declaration „shall be renewed when substantial changes in the composition or production occur that bring about changes in the migration from the materials or articles or when new scientific data becomes available”.

Click-Pack Sp. z o. o. undertakes to renew this declaration when only mentioned facts will take place.
